Excerpt from The Antiquary, Vol. 8: A Magazine Devoted to the Study of the Past; July-December, 1883 The Englishman, therefore, who composed the Troilus was acquainted not only with the poetry of Boccaccio, but with the works of the two other members of the great Florentine triumvirate. Such knowledge as this must have been rare, or rather unexampled, in Chaucers time, and amongst his contemporaries, and there is nothing to lead us to believe that Chaucer, though he at some time mastered the Tuscan dialect, had any means of making this acqui sitiou so long as he remained in England. He must therefore have learnt the aulic Italian somewhere else than here. Precisely the same difficulty attends the verse which he used in this poem. It is written, as we have said, in lines ten syllables long, but such a form had never been em ployed or ever been known in England. He did not therefore find it here. How he found it I will shortly suggest. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
