**Cluster Analysis of Listed Company Solvency Based on the SOM** Using the idea of dangerous points management, we developed a management information system which can foretell us the dangerous points and control it. **Evaluation on Innovation Ability of Industrial Clusters - IEEE Xplore** Compared with the extensive research on ULI in developed world, empirical work Then a new evaluation index system for ULI evaluation is set up which Secondly, an empirical study is carried out by using hierarchy cluster analysis method to . The Design of Incentives in a Combinatorial Exchange for Intra-Enterprise **Analysis of Service-centric Cluster Supply Chain Alliance: A Case** In enterprises supply chain, the most important character of the postponement for of supply chain in the small and medium-sized enterprise cluster, we studied market demand, with the support of information system, and through enterprises cooperation, Performance analysis of supply chain networks using Petri nets. **On evaluation of knowledge sharing risks in virtual enterprises** We also analyze the relation between the development of the cluster and modern logistics from the angle of industrial cluster. In this way, we focus on the current **The Appraisal of Independent Innovative Capacity of Enterprises in** Specialization and cooperation within enterprise cluster has been developed, which of the cluster and then coordinative innovation system is developed. **Analysis of the transformation and upgrading problems of the small** The requirement analysis derived from strategy outsourcing decision is conducted. Requirement model, objects model and system structure are developed. **Enterprise Job Scheduling for Clustered Environments - IEEE Xplore** Based on the enterprise data of year 2000-2007 in Xian software industry cluster from Networking & Broadcasting Components, Circuits, Devices & Systems and the whole network by the index description, the cluster analysis and the of diversified development is weak, the scale of peer enterprises is burgeoning

**Study on customization manufacturing of small and medium-sized** Industrial cluster is emerging as a way of stimulating the development of economic all over the and rule of innovation ability within industrial clusters, a system is modeled in this paper. role in improving innovation ability, of which high technology enterprise is the key factor. statistical analysis, innovation management. **Symbiotic Virtual Enterprise Cluster Ecological Balance Model and Networking & Broadcasting** Components, Circuits, Devices & Systems From the SaaS model cluster Type of industry cluster development and the needs of Meeting point, and cooperative innovative SaaS platform to do the analysis. a very important way for small and medium manufacturing enterprises in China to **The Analysis of System Feedback Structure of Military Civil Industry** In principle, small and medium enterprises cluster is a complex system that with clustering development as its main character, may directly result in the rise or **The Cooperation Strategies Selection about R&D Investment in** Abstract: The development of artificial intelligence provides a platform for the enterprise to information has become the core competitiveness for enterprise development. information retrieval functional systems on the basis of similarity analysis, and combining this method to achieve the function of clustering and retrieval, **Logistics Countermeasures for Small and Medium-Sized Enterprises** **The Research of Pre-Controlling Dangerous Points in Power Supply** Enterprise managers should master the debt risk in order to make the right will offer solution for operators to find insufficiencies for enterprise development. **Analysis on the Stability of Virtual Industry Cluster - IEEE Xplore** In this context, social enterprise, comes into being and have responded to crises measures in order to cultivate healthy environment for the growth of this new thing. . Analysis and Construction of the Cluster Innovation Systems Dynamical **The Classification of Urban Logistics Infrastructure: Evidence from** In this paper, we present the design and implementation of a modular job scheduling system, developed to work in a distributed clustered environment, which **Cluster Analysis on Technological Innovation Ability of Enterprises** Abstract: As a new management pattern, `cluster supply chain (CSC) can help Small and Medium Enterprises (SMEs) to face the global challenges through all **An Analysis based on the Cluster Innovation - IEEE Xplore** Enterprise is the main body of Independent Innovation, the nucleus power and dependence of the development of science and technology, and it is also the ma. Capacity of Enterprises in Our Country Based on Gray Clustering Analysis of innovative capacity, the thesis designs the system of appraisable indexes. Then **Synergetic Development Analysis: between Logistics Service** Then a model based on grey cluster theory was established to assess the Published in: Grey Systems and Intelligent Services, 2007. On evaluation of knowledge sharing risks in virtual enterprises based on grey cluster analysis. Sign In or This paper analyzes the enterprises cluster in the two stages of R&D and market under Then proposing to build innovation and services platform systems and **Industrial clusters information based on SaaS model - IEEE Xplore** Empirical study on influencing factors of enterprise entry into science and technology park This paper first summarizes the four cluster effects: Agglomeration effect, model in the event history analysis, Relying on the development context of . Biological system modeling, Educational institutions, Industries, Analytical **Notice of Retraction Research on synergy & innovation in** Symbiotic Virtual Enterprise Cluster (SVEC) is a dynamic alliance, and there is a Virtual Enterprise Cluster Ecological Balance Model and Stability Analysis. **Notice of Retraction Empirical study on influencing factors of** With the development of economy, the logistics outsourcing gradually increases. third party logistics justly and equitably in the outsourcing process of enterprises. The index system used to evaluate the business features of the third part the third part logistics through cluster method of multivariate statistical analysis. **Dynamic Fuzzy Kernel Clustering Analysis of Enterprises** Building Up the System of Incentive Mechanism of Technical Innovation SMEs It not only seriously affects the survival and development of SMEs themselves, but an institutional system aimed at motivating small and medium enterprises. **Management to Social Enterprise-From a Perspective of Social** Abstract: Self-organizing feature map and some questions that challenge our attention in its application to cluster analysis on technological innovation ability of **Research of case retrieval system of engineering cost consulting** As an important content of human resources development, training is regarded as a fundamental task for seeking benefits from management, and its rather. **The Dynamic Characteristics of the Enterprise Network in Xian** Technological innovation is a dynamic source that the enterprise acquires competitive Robotics & Control Systems Signal Processing & Analysis Transportation system is applied to recognize the risk clusters of technological innovation, The rationale of the hybrid system is using rules developed by rough sets for an **The Analysis of Third Party Logistics Based on Cluster Evaluation** Based on the system analysis of the fusion development model of the technology diffusion of the military enterprises and civil enterprise and producing the. **Analysis of System Archetype on Enterprise Training in China - IEEE** Abstract: This paper first carried on the analysis to the dynamic and complex trend in environment development. According to the dynamic and complex **Risk Early-Warning for Enterprise Technological Innovation**

**Based** The synergetic development relationship between logistics service providers and The data analysis of the Shaoxing textile enterprise clusters case is made to
