

Combining philosophy with practical politics, an expanding area of policy studies applies moral precepts, critical principles, and conventional values to collective decisions. This evolving new approach to policy analysis asserts that the same variety of ethical principles available to the individual are also available to make collective decisions in the public interest and should be used. Although policy analysis has long been dominated by assumptions originally developed for the examination of markets, such as efficiency, these essays by leading scholars - the best work done in the field over the past three decades - explore alternatives to the "market paradigm" and show how moral discrimination and choice can extend beyond the individual to encompass public decisions. Chapters by John Martin Gillroy and Maurice Wade review the political philosophies of Immanuel Kant and David Hume as backgrounds for the development of modern concepts of public policy choice. They present this anthology as a first step in codifying options, arguments, and methods within this important developing area of policy studies.

The Jeffersonian Republicans: The Formation of Party Organization, 1789-1801 (Published for the Omohundro Institute of Early American History and Culture, Williamsburg, Virginia), The American revolution, Issues for Debate in American Foreign Policy: Selections from CQ Researcher, The Migration Experience in Africa, Palio and Its Image: History, Culture, and Representation of Sienas Festival, Yearbook of the International Law Commission 2005 (Volume II Part 1), A Global History of Modern Historiography,
