

The empathy that flooded into America from around the globe after 9/11 has faded, and now America is arguably more unpopular than it has ever been. As global anti-Americanism threatens the modern world, Loch Johnson explains how the U.S. has drifted away from the principles that made it a highly regarded global leader at the end of the Second World War. *Seven Sins of American Foreign Policy* explores the negative worldwide attitudes toward the U.S., identifying how the antipathy runs much deeper than American political leaders' response to the 9/11 attacks. Johnson's compelling insight isolates seven key foreign policy issues that are at the root of America's problematic global image, causing an alarming loss of allies across the globe: Ignorance Veneration of the president Militarism Unilateralism Isolationism Lack of empathy Arrogance
